Postage Meters

SendPro™ P3000

Set a new standard for performance.

Make critical gains in productivity and efficiency.

Your mail centre is a hub of business activity. How you equip your business has direct consequences to your costs and revenue. The SendPro P3000 mailing system is designed to meet the demands of your busy mail centre. It simplifies and integrates mailing and receiving into a single system providing a more streamlined way to send letter mail and large envelopes. With sending costs rising and becoming more complex, the P3000 can also quickly improve productivity and cost efficiency in your office.

Meet your daily challenges.

The SendPro P3000 mailing system guides your operators with its easy-to-follow menu on the colour touch screen, so that anyone in your organisation can operate it. For letter mail, the SendPro 3000 will seal and print postage for mail up to 19mm thick at up to 310 letters per minute.

With the Weigh-on-the-Way® and Dimensions-on-the-Way® (DOW), sorting mixed size mail is no longer necessary. The P3000 can process a stack of mixed size mail at up to 205 letters per minute applying the correct postage for each piece. With the receiving application, you can accurately log all of your incoming packages and important documents so that you have a history of every item that has been delivered to your office.

Intuitive user display

The modern, colour touch screen display of the P3000 enables anyone in your office to pick the ideal service and complete each job quickly and accurately. The system guides the user with its easy-to-follow menus for processing mail.

Flexible printing

The P3000 also gives you unique control over envelope printing. From any desktop PC, you can upload your graphics to print a business logo, return address, or promotional message in full colour on outbound envelopes. Print just one or print a thousand. The savings add up. Its quick changeover gives you printing flexibility and can eliminate the premiums you pay for special envelope stock.

Manage inbound deliveries.

Automate and streamline the receipt and management of incoming items using your P3000 and its integrated barcode scanner. The P3000 instantly logs package information, including carrier, recipient, sender, tracking number and date and time of receipt, keeping a history report of all your incoming packages so you know when each package was delivered. You also have the option to automatically alert the intended recipient with email notifications, making the entire process more accurate and efficient.

This Pitney Bowes product is Mailmark™ compliant. Pitney Bowes customers have access to all the numerous features and benefits that Mailmark can offer.
