DM220i™
digital franking machine

Make your postal budget go further

The DM220i digital franking machine provides detailed web based postal spend reporting to help you take control of your expenditure

It can also print a return address on your envelope, so undelivered mail gets returned. This quickly improves the accuracy of your mailing database and reduces expenditure on subsequent marketing campaigns.

Even when not in use, it minimises your costs. After a period of inactivity, it automatically enters a low-power sleep mode, so minimising your energy bill.

Save money every day

The DM220i digital franking machine franks the correct tariff on each letter and parcel every time, so postage costs are kept to a minimum.

Suitable for even the smallest office

This compact machine sits unobtrusively on a desktop and its integrated weighing platform (up to 5kg), means there's no need for separate scales. It operates with minimal noise, so won't disturb other activities taking place nearby.

A flexible solution

It effortlessly processes up to 45 pieces of mail a minute and handles mail up to 9.5mm thick. Larger items are processed using tape strips.

There's no need to sort mail into separate weights and sizes. It will apply the correct tariff to each item as it's removed from the weighing scales. An optional weighing platform allows you to weigh items up to 35kg.

Easy to use

The interactive menus displayed on the control panel are intuitive and simple to use. They're backed up by user-friendly instructions that lead even someone who's never franked mail before through each stage of a task.

Manage your time effectively

Up to five presets minimise preparation time for common jobs. And you can advance the date and prepare mail ready for sending later in the week - perfect if you've time spare today and a hundred and one things that need to be mailed out tomorrow.

NORTHERN SERVICES

Print promotional messages on every envelope you frank

Turn your mail into a powerful revenue-generating tool

Get your mail opened and read

Printing a promotional message on every envelope you frank ensures your mail is more likely to be opened and read ahead of mail sent by your competitors. On top of this, our advanced ink-jet technology produces a professional impression every time. It's a simple and cost effect way of letting customers and potential customers know your company has high standards.

Stay connected

Being connected to us via IntelliLink™, means you have constant access to an invaluable suite of services such as re-crediting, envelope messaging, postal tariff changes and software upgrades.

Know the facts

Applying a date and time stamp to incoming mail as its received avoids any confusion about when an item was received.

Monitor costs

INVIEW™, our web-based, easy to use, accounting feature allows you to:

• Have visibility of your postage expenditure by class, format and department
• Extract information and present simple graphical analysis
• Track up to 100 accounts so you can bill clients or cross charge between departments
• Monitor spending to identify waste e.g. overuse of first class or large letter format

No more queuing for stamps

Re-credit your machine at the touch of a button. And get up to 55 days free credit by taking advantage of Purchase Power, our post now and pay later service. This also allows you to consolidate supplies and maintenance invoices onto a single monthly statement so minimising your administration costs.

A gateway to the future

The DM220i's digital meter indicia satisfies all current postal regulations, and the technology's flexibility makes the DM220i adaptable for the future.
